

Foundational Stage Curriculum

The formative years (0 to 8 years) stand as a pinnacle of growth and maturation in a child's journey, where the cornerstone of comprehensive development and lifelong learning is set. Within this pivotal window, children who engage in enriching early childhood education programs unveil remarkable strides across social, educational, and intellectual dimensions. Our educational canvas paints with 21st century hues, guided by the roadmap of NEP 2020. Embedded within our approach is a theme-based curriculum christened SMILE.

These principles orchestrate a symphony of skill development, ushering communication, critical thinking, creativity, and collaboration onto the stage of learning. At New Horizon, we reverently furnish each student with an opportunity to metamorphose into a paragon of virtue - a compassionate, conscientious, introspective, inventive, empathetic, and industrious human being.
